Profile

I'm a developer with more than 3 years of experience in carrying out private projects as a freelance (this last year directly in the banking sector). I have a strong knowledge of different design patterns and software architectures that allow the fulfillment of objectives. Additionally, I have a greater affinity towards backend development, I like challenges and prove myself, to improve and learn new ways to solve problems. Excellent communication skills, always willing to listen and share ideas with my teammates. Passionate about sharing knowledge and learning new skills from everyone around me.

Back-End knowledge such as Advanced Java Native and Spring Boot (Batch processing and Micro services REST API), Intermediate PHP and Laravel (REST API), Intermediate PL/SQL, Basic Python.
Front-End knowledge such as HTML5, CSS3, Javascript (mainly Angular)
Basic knowledge on shell commands for Windows and Unix based OS, including AIX (Unix OS from IBM).

Work Experience

Ronald Mallok - Team Manager at **Scotiabank Technology (Scotiabank - Colombia)**

Phone: +57 601 425 2330, **Ext:** 72714, 72765

Email: scotiagbscolombia@scotiabank.com

Backend Software Engineer Specialist

May 2022 - Present

Currently I'm leading a small group of backend developers to guide them, help them and assign them multiple task according to the technical requirements of the project.

Other activities including the mentioned on the previous position:

- Test new functionalities and coordinate the deployment and promotion for pre-production environments.
- Development of new tools and libraries that improves the current projects.
- Support for production and non-production implementations.

Backend Software Engineer Associate

May 2021 - May 2022

Hired from a team that requires a backend developer with highest knowledge on JavaSE and JavaEE, to develop different batch and microservices programs to accomplish with the architectural design and functionality of the whole project.

Since I started working in the bank, I have being recognized and highlighted for the technical leader and manager team for:

- Lead the development of multiple batch modules that exchange files with Mainframe applications (COBOL).
- Develop a module that manage the database connection, requesting credentials stored in a Azure Key Vault on the Cloud using TLS.
- Show accountability and ownership to deliver multiple projects on time.
- Design and development of the database for the current involved projects.
- Research the integration of new frameworks/libraries that improve the performance of projects.
- Being the most active user in the Team's channel, answering and helping other team members with their issues.
- Mentor on a "Java Bootcamp" program, teaching programming to other employees of the bank.

I have shown great performance and commitment working remotely, together with part of the Canadian team.

Work Experience

Filippo Massara - CEO at **EURO DECO S.A.S.**
Phone: +57 601 702 6362, +57 300 425 7367
Email: filippo.massara@eurodeco.com.co

Semi-senior Fullstack Developer

December 2020 - May 2021

The company hired me to develop the backend for an online store, with the requirement that it could only be accessed through a mobile application (API REST implementing OAuth2 Passport as authentication layer). Therefore I used the Laravel framework to accomplish this task.

Also, I designed and developed the company's website using Angular, improving the performance and style of the corporate image.

Alejandra Serrano - Administrative and Financial Manager at **QPCOM Colombia**

Phone: +57 601 485 8282, Ext. 104

Email: administracion@qpcom.net

Technical Director

March 2015 - November 2020

I developed a small information system, that allowed all the CRUD methods, to manage an appropriated registry of those products that was sent by the end customer to the company. All of this with a MVC architecture, with PHP.

Sales Executive

March 2012 - March 2015

The flow of information in the sales area of the company, it was necessary to generate reports that would help the managers with decision-making.

This is why with Visual Basic for Applications, supported con Excel, I developed tools that would allow the generation of these reports.

Studies

Technologist in Analysis and Development of Information Systems

Servicio Nacional de Aprendizaje - SENA

February 2020 - Present

Technician in Computer Science, Programming and Website Design

Organización OANDES

February 2008 - December 2009

Academic Bachelor

Instituto San Bernardo De La Salle

February 1995 - November 2007

Virtual courses and trainings

Java University (JDK 14)

February 2020 - November 2020

Python 3

September 2018 - April 2019

RESTful API with Laravel

February 2017 - June 2017

Angular 10

June 2019 - October 2019

PHP7 and MySQL

August 2016 - December 2016

Web Design with HTML5, CSS3 and JS

January 2016 - March 2016

JAVA Fundamentals

July 2015 - November 2015

Spring Boot

March 2021 - June 2021
